STUDY GUIDE

HTML REVIEW

Tag	Description	Example
<h1> –<h6>	Used for headings of various sizes. h1 should be the main heading of the page, with smaller numbers for subheadings elsewhere in the document.	The HTML Times
	Paragraph tag, used for typical text.	This text describes a shocking development in HTML news.
	Division tag, used for a generic section of content.	I'm a special paragraph deserving of my own section.
and	List and list item tags, one for the overall list and another for each individual item.	1 2 3

Class attributes are used to give a similar style and feel to many different elements

```
<p class="green-text">Now made from 100% recycled content</p>
```

ID attributes are used to target one, very specific element on the page

```
<p id="legal-disclaimer">SafeCorp is not responsible for user's safety.</p>
```
